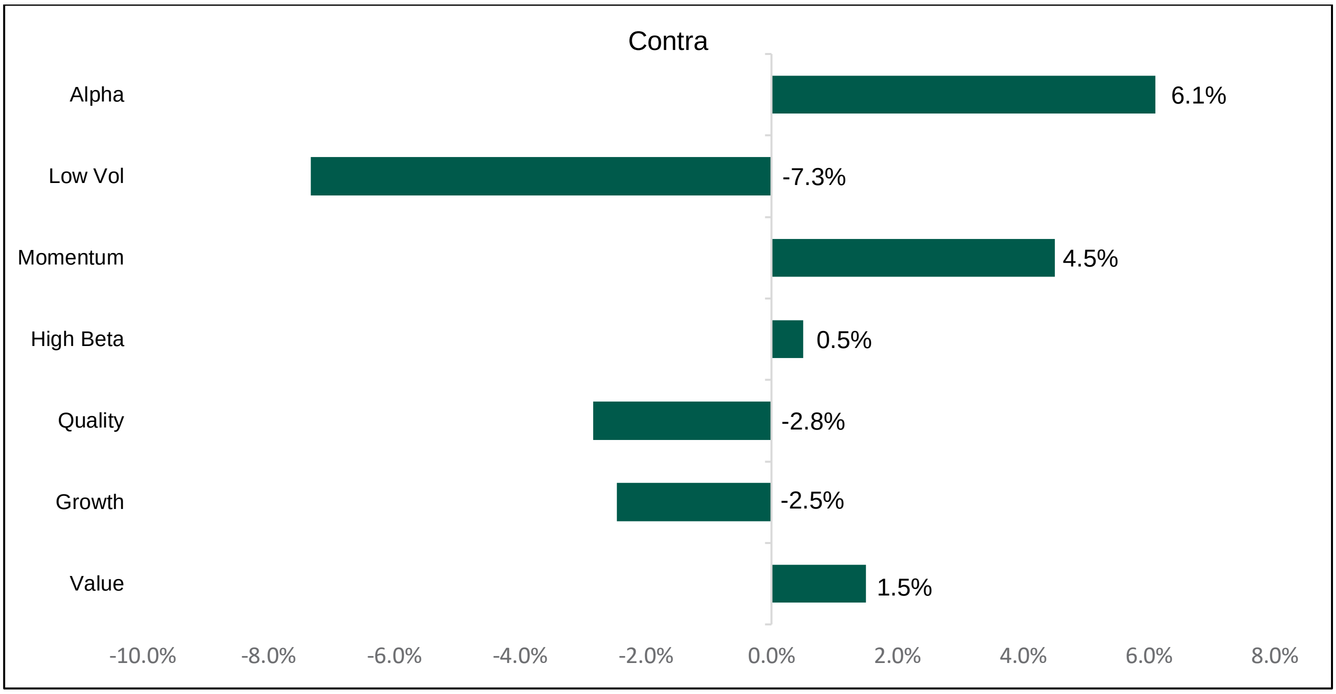
Factor Box



The Factor Box provides relative factor exposure vis-à-vis a given benchmark. For instance, if the Growth factor exposure in a portfolio is 23% and the Growth factor exposure of the Benchmark is 20%, it indicates that your portfolio is "Overweight" on Growth with respect to the benchmark. A positive Value in the above Factor represents that the given portfolio is Overweight in the factor with respect to the benchmark. Similarly, a negative value would represent that the given portfolio is underweight in the factor with respect to the benchmark.
