Axis Intellect (AI) **Aggressive AI**

Based on quantitative dynamic multi-factor strategy approach, these investments adjust the style exposure according to the economic environment and the overall market condition and enable you to earn higher gains.

Overview

Stock investment endeavours to deliver consistent outperformance in the long term by making a diversified investment of 'Winners'. Axis Intellect (AI) Score based Investment Approach for Stock Selection **applies unique approach to deliver alpha by applying equal exposure to 'Core' and 'Satellite' factors.**

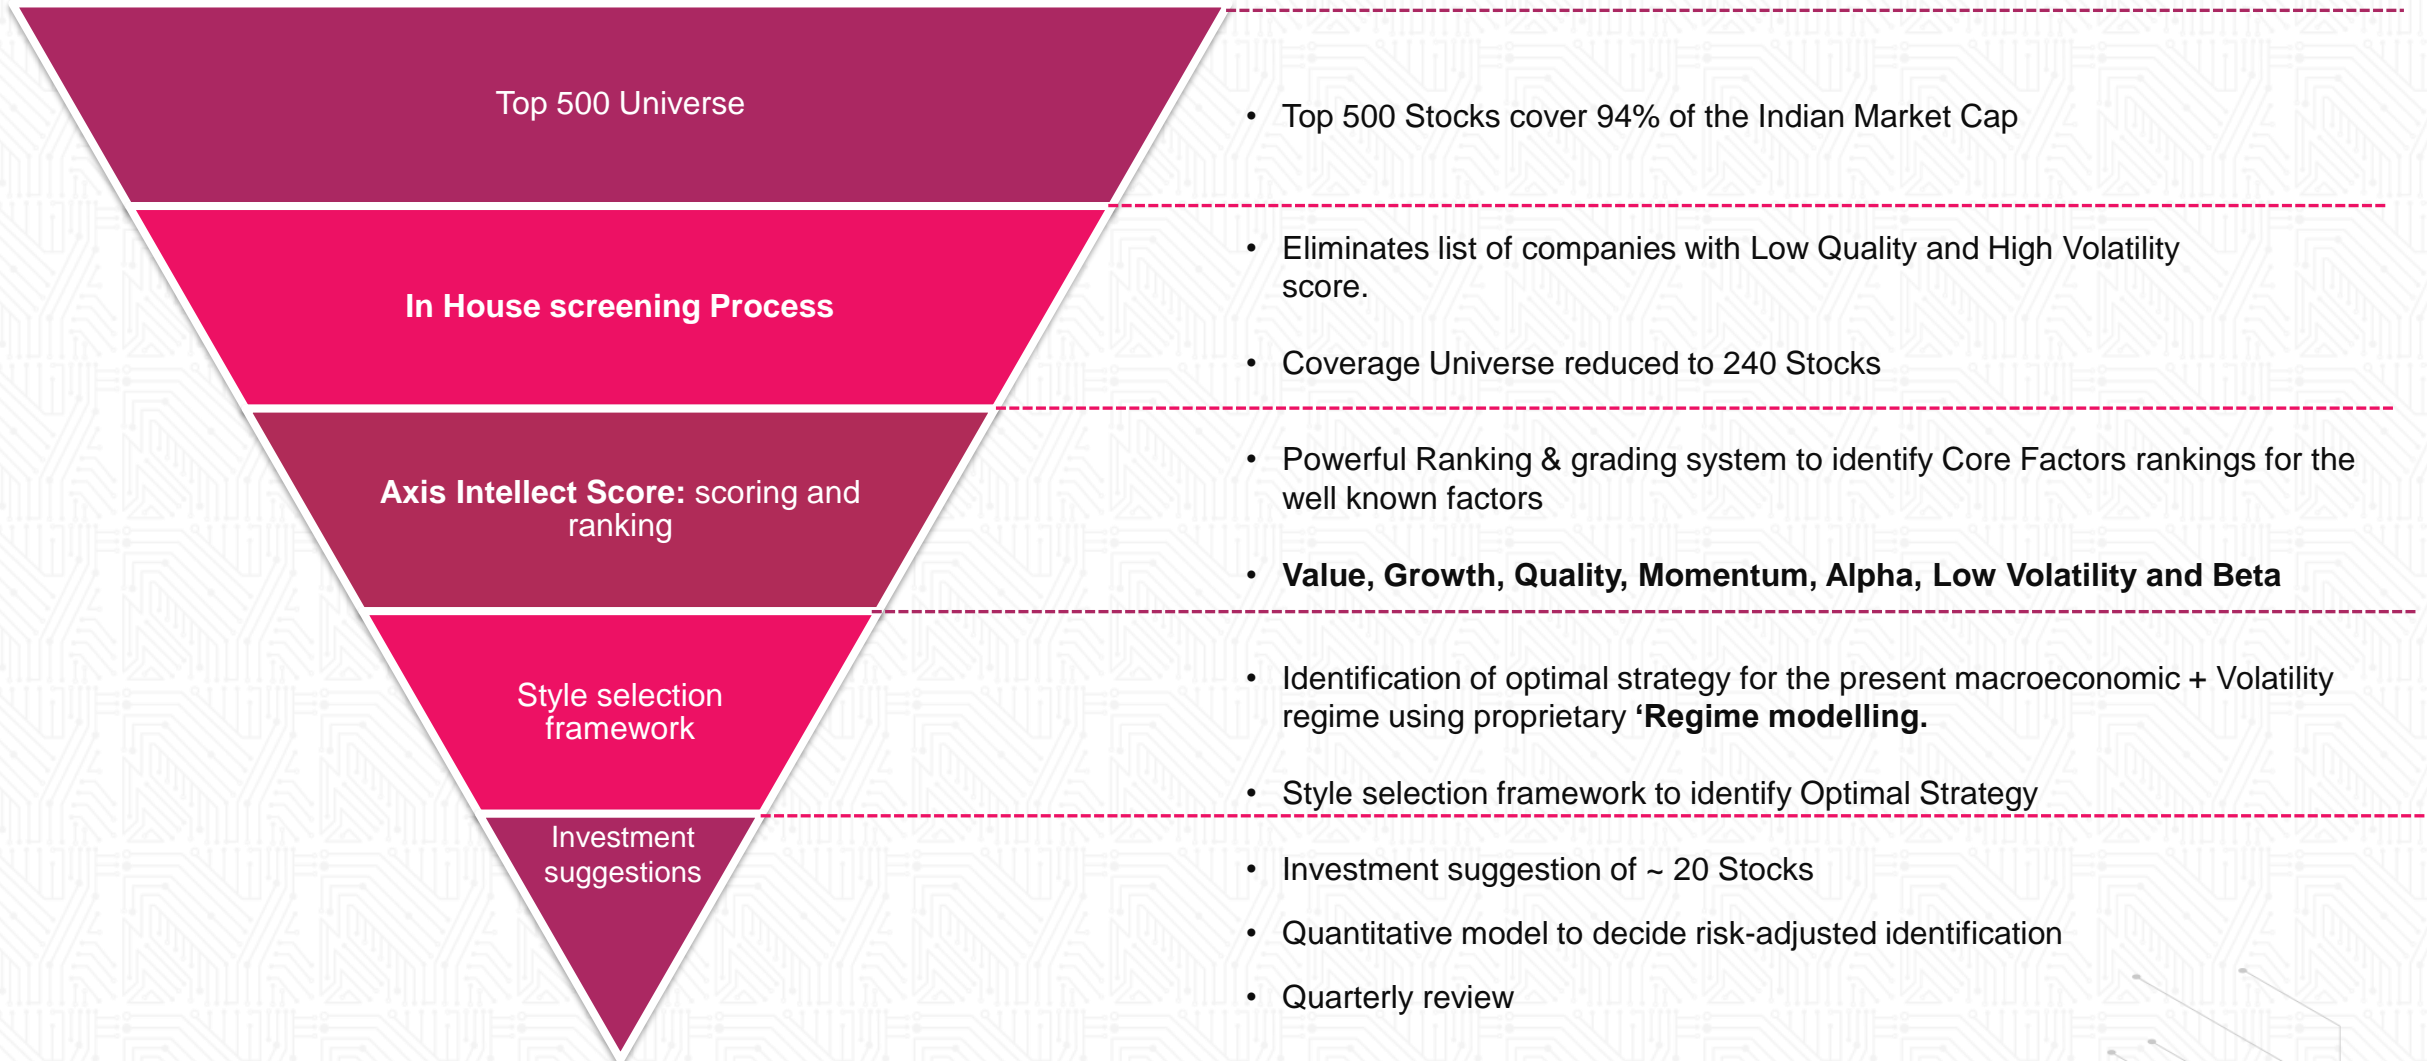

What are 'Core' Factors': Low Volatility, Value, Growth, Quality, Momentum (Equal weighted 50% exposure)

What are 'Satellite' Factors: Factors that have historically done well in the predicted regime modelling (Remaining 50% exposure)

Key features

- Consistently generated superior returns
- Superior risk-adjusted long-term returns
- 1.6x returns from April'22 to Sep'25

Our Unique Process Flow

How we run Screening

Our approach:

- Removes the Low Quality stocks to ensure higher stability of the strategy in a down cycle.
- Furthermore, it removes the highly volatile companies from each sector, typically the cyclical stocks, which may not add superior returns in long run.

Remove Low Quality

Proprietary model removes the bottom 4 Decile stocks of each sector of Low Quality score

Remove high Volatility Stocks

Model further removes the bottom 2 Decile of the highest volatile stocks from each sector.

240 Stocks Universe

After removing the low quality and High Vol stocks from each sector, we are left with 240 stocks. Which is our new universe.

What is 'Axis Intellect' (AI) Score

'Axis Intellect (AI) Score' is a distinctive score generated through a robust ranking & grading system to identify rankings for well-known factors and styles of the market.

Value Factor

Utilizes valuation ratios to rank stocks that are attractively priced relative to fundamentals

Beta

Ranks the stocks based on 1-year Slope of the stock with respect to the index

Alpha

Ranks the stocks based on Jensen's Alpha

Low volatility

Ranks the stocks on Low to High volatility

Momentum Factor

Momentum score is being calculated based on the phenomenon: Stock generally tends to maintain the recent price trend in the future

Growth Factor

Uses fundamental growth factors to rank stocks based on higher top line and bottom line growth, margin expansion, and cash flow growth

Quality Factor

Ranks companies as High or Low quality based on Returns Ratios and Earnings variability

Indian Regime forecast

- Our Proprietary model to predict Indian regime using Macro economic and Volatility forecast.

Nifty Volatility Regime

- Model to forecast volatility
- Binary Output
- Calm State (Less Volatile)
- Chaos State (Highly Volatile)

Macro Economic Regime

- Model to forecast Macro economic regime
- Regime Forecast based on:
GDP growth, CPI, IIP,
FDI, M3 money Supply,
Interest rates, Bond
Yield, Exchange rate,
Unemployment rates

Indian Market Regime

- **Strategy combines the Output and set the Regime for Indian equity Market**
- **Consistent learning Strategy with evolving market condition**
- **No Human bias**

Style Selection Framework

- Our proprietary model identify the optimal strategy for the forecasted Indian regime by applying equal exposure to 'Core' and 'Satellite' factors.

Indian Market Regime

- Model combines the Indian Regime output with Factor Returns series
- Dynamic model identify the top performing Factor or style that has historically done well in the predicted regime

Identification of 'Satellite' Factor

- Satellite: Factor that has historically done well in the predicted regime.
- Dynamically identify the factor based on the changing Market regime
- 50% weightage given to the AI score of the 'Satellite' factor for each stocks

Identification of 'Core' Factor

- Core: Equal weight exposure goes to Value, Growth, Low Volatility, Momentum and Quality.
- This ensures that half of AI score is always balanced. (Provides more stability to the strategy)
- 50% weightage given to the AI score of the 'Core' factor which is a average of Value, Growth, Low Volatility, Momentum and Quality

Optimal Strategy

- Investment ideas of ~20 Stocks
- Quantitative model to decide risk-adjusted weights
- Quarterly rebalance
