Nifty opened on a flat note, but sustained buying momentum throughout the session led it to close near the day's high. Nifty closed at 23869 on 26th June, marking a gain of 148 points.

On the daily chart, the index has formed a long bullish candle, forming a higher high-low compared to the previous day, and has closed above the previous day's high, indicating a positive bias. The index is moving in a higher top and higher bottom formation on the daily chart, indicating a sustained uptrend. The chart pattern suggests that if Nifty crosses and sustains above the 24000 level, it would witness buying, which would lead the index towards 24100-24200 levels. Important support for the day is around 23800. However, if the index sustains below 23800, then it may witness profit booking which would take the index towards 23700-23600 levels. Nifty is trading above the 20, 50, 100, and 200-day SMAs, indicating a positive bias in the short to medium term. Nifty continues to remain in an uptrend for the short term, making buying on dips our preferred strategy.

The daily strength indicator RSI has turned positive from the 60 mark and is above its reference line, indicating a positive bias.

The trend-deciding level for the day is 23810. If Nifty trades above this level, we may witness a further rally up to 23950-24030-24170 levels. However, if Nifty trades below 23810 levels, we may see some profit booking initiating in the market, which may correct Nifty up to 23730-23590-23510 levels.
