Bank Nifty	44,623.85	-1.68%	44145	44385	44830	45070	45515

Nifty opened with a downward gap, and selling pressure throughout the session led it to close on a negative note. Nifty closed at 19742 on September 21st with a loss of 159 points.

On the daily chart, the index has formed a bearish candle with a lower shadow, indicating support near the 20-day Simple Moving Average (SMA). After a breakdown from the rising channel, the index continues to witness profit booking. The chart pattern suggests that if Nifty crosses and sustains above the 19800 level, it would witness buying, which could lead the index towards 19900-20000 levels. An important support for the day is around 19700; however, if the index sustains below 19700, it may witness profit booking, which would take the index towards 19600-19500 levels. Nifty is trading above the 20-day, 50-day, 100-day, and 200-day SMAs, indicating a positive bias in the short to medium term. Nifty continues to remain in an uptrend for the short term, so buying on dips continues to be our preferred strategy.

The daily strength indicator RSI is moving downwards and is quoting below its reference line, indicating a profit booking.

The trend-deciding level for the day is 19765. If NIFTY trades above this level, we may witness a further rally up to 19825-19905-19965 levels. However, if NIFTY trades below 19765 levels, we may see some profit booking initiating in the market, which may correct up to 19685-19630-19545 levels.
