

Prime Research and Services

Stock Ideas with specific strategies!

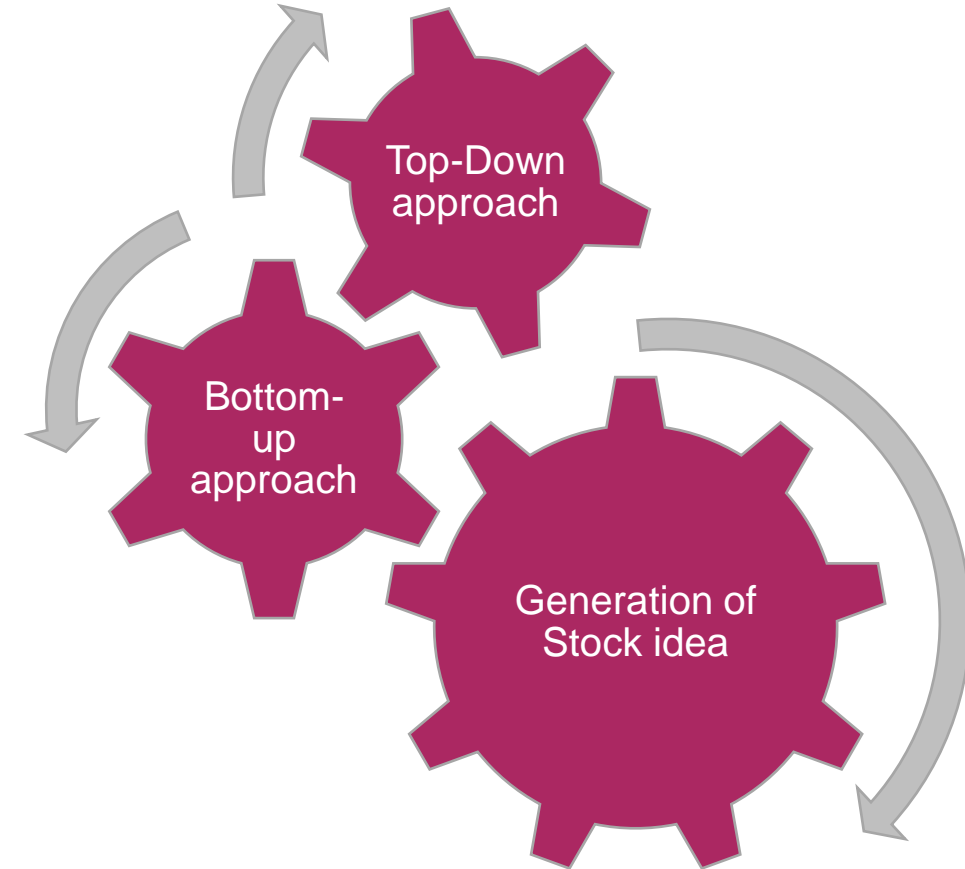

Why Axis ?

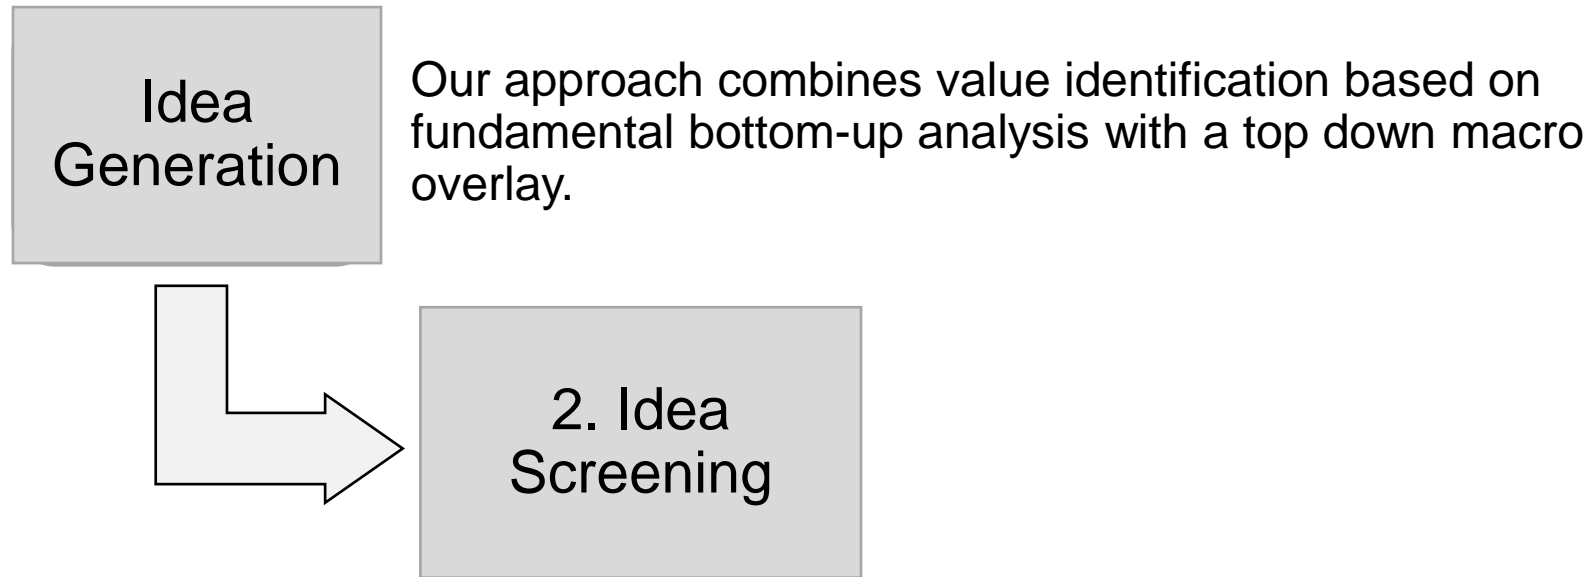

Our stock selection process comprises of three stages:

1. Idea
Generation

Our approach combines value identification based on fundamental bottom-up analysis with a top-down macro overlay.

Our stock selection process comprises of three stages:

Screening helps in separating voice from noise in the market.

Stock Idea must pass through following screeners:

1. Forensic Accounting analysis framework
2. Qualitative advancement

i. Forensic Accounting analysis framework

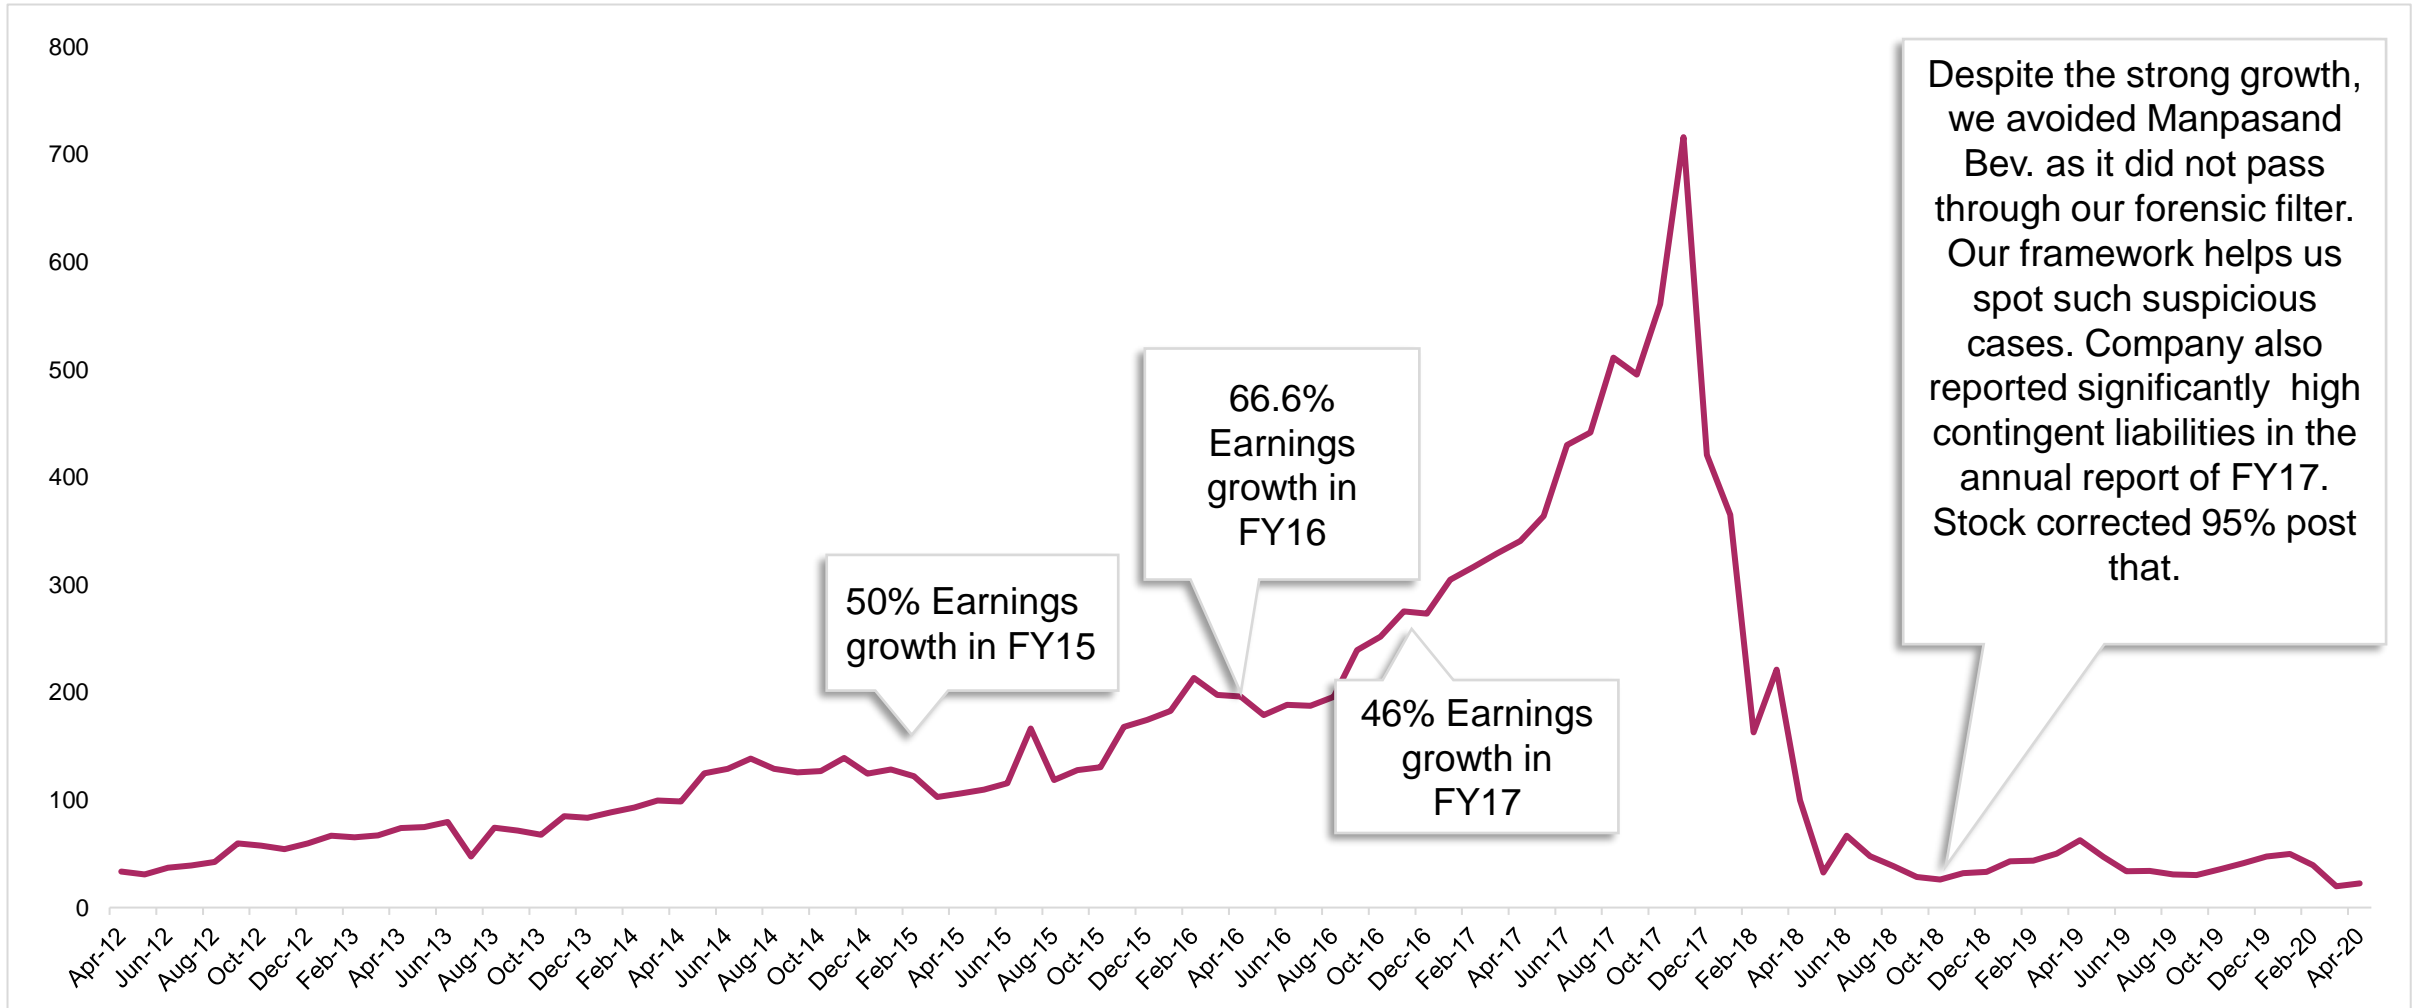

Our stock coverage universe is based on a forensic accounting analysis framework as the hygiene factors of clean accounting principles are critical.

The key forensic accounting screeners are as follows:

- History of Promoter Holding / Pledging
- Corporate Structure
- Board Composition & Managerial remuneration
- Prudent capital allocation policy.
- Cash flow from Operations as a % of EBITDA
- Yield on Cash and Cash Equivalent
- CWIP as a % of Gross block
- Contingent Liabilities as a % of Net worth
- Change in reserves explained by profit/loss for the year and dividends
- Debtor days and provisioning of doubtful debts which are older than 6 months.

Case Study : Manpasand Beverages

ii. Qualitative advancement framework:

We rigorously focus on companies that satisfy all the criteria given below:

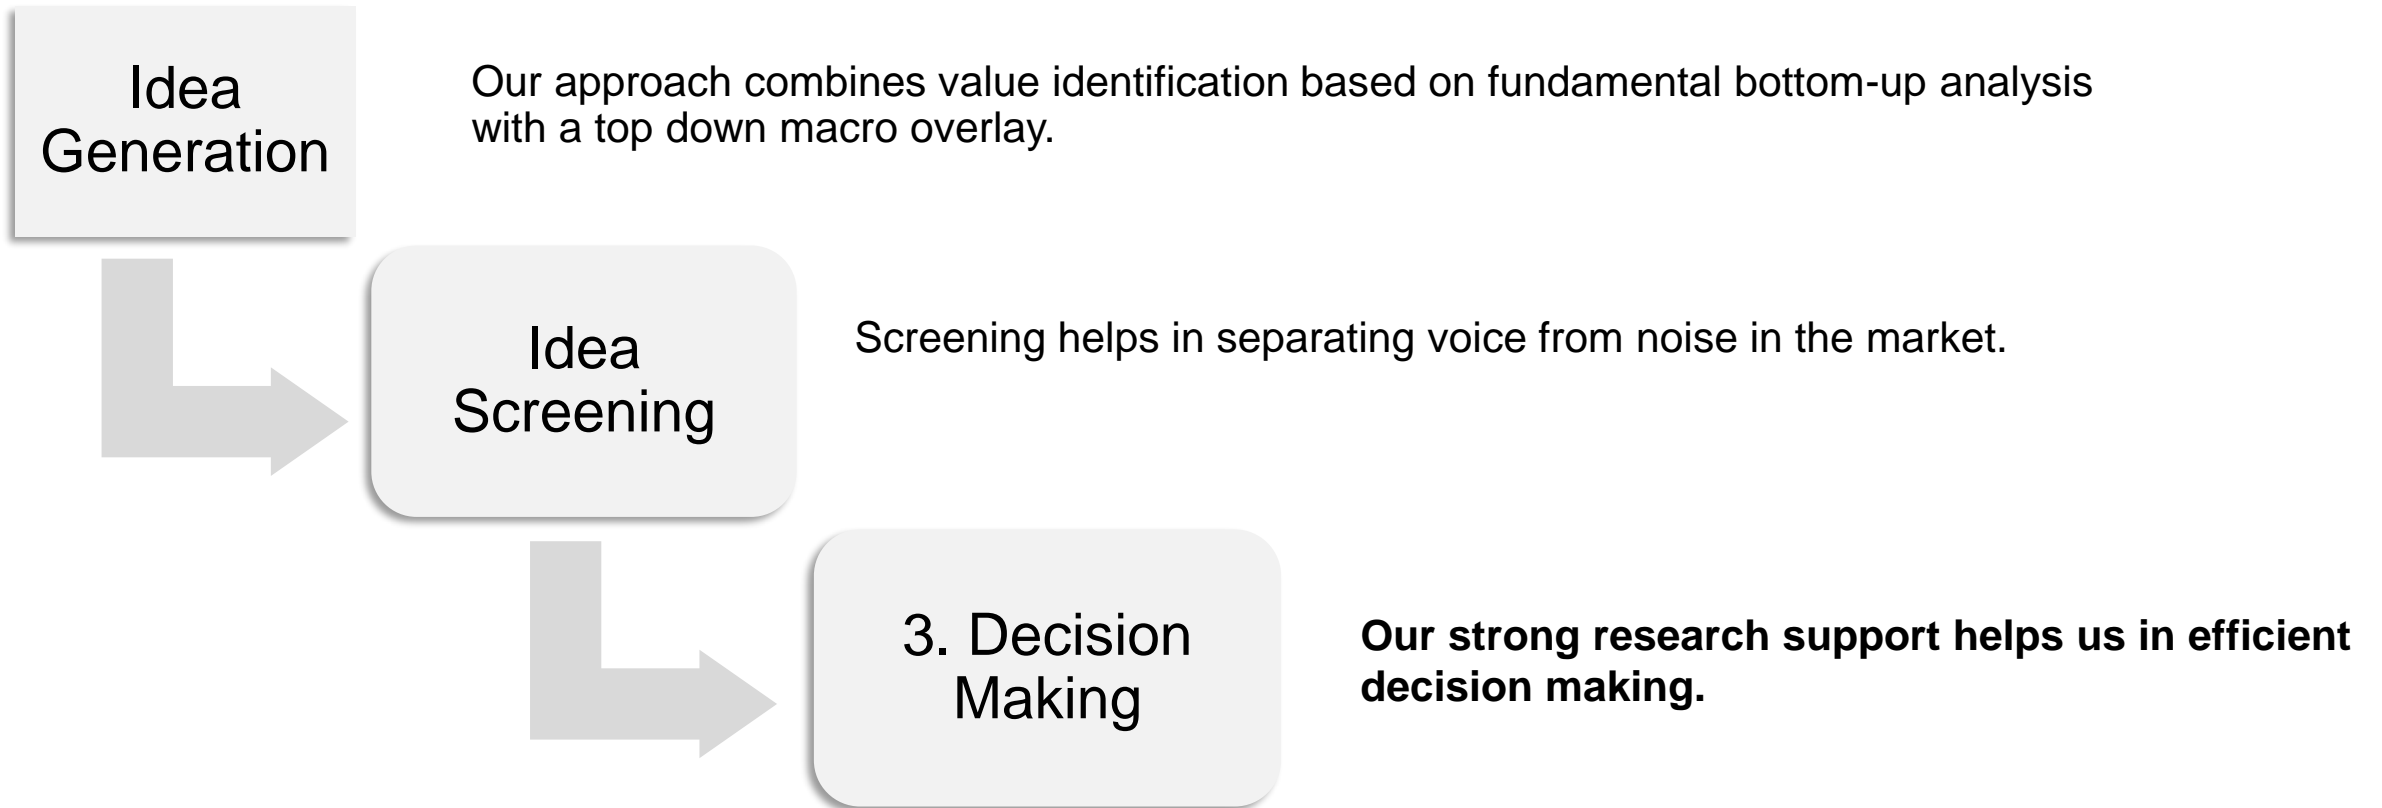

Stocks with operating profit growth significantly high within their operating sector

Sustainability of long-term growth marked by our proprietary parameters called 'MACROS'

- Market share - Leading players in sector are preferred
- Advantage - Companies having strong competitive advantage / differentiating factor
- Cash flows - Positive cash flow to firm and preferably growing
- Return ratios - Improving return ratios
- Opportunity size - Sectors or stocks that are in their 'Introductory' or 'Growth' phase
- Sustainability - Healthy corporate governance that help ensure sustainability.

Our stock selection process comprises of three stages:

3. Decision Making

- We believe strong historical performance of companies reflect their ability to deliver in future. Thus we also look at the historical growth performance that provides better insights on valuation parameters.
- We perform in-depth valuation analysis to arrive at the intrinsic value of company that assists in our decision making process.
- In our quest for long term outperformance, we choose to avoid highly cyclical and commodity businesses, while chasing growth.

- Consistent **'High Growth & QARP'** Stock Ideas
- **Value, Contrarian and Special Situation** Stock Ideas

QARP- Quality at Reasonable Price

Core Features

Objective

- The objective is to seek returns with a long term investing approach for better risk adjusted return

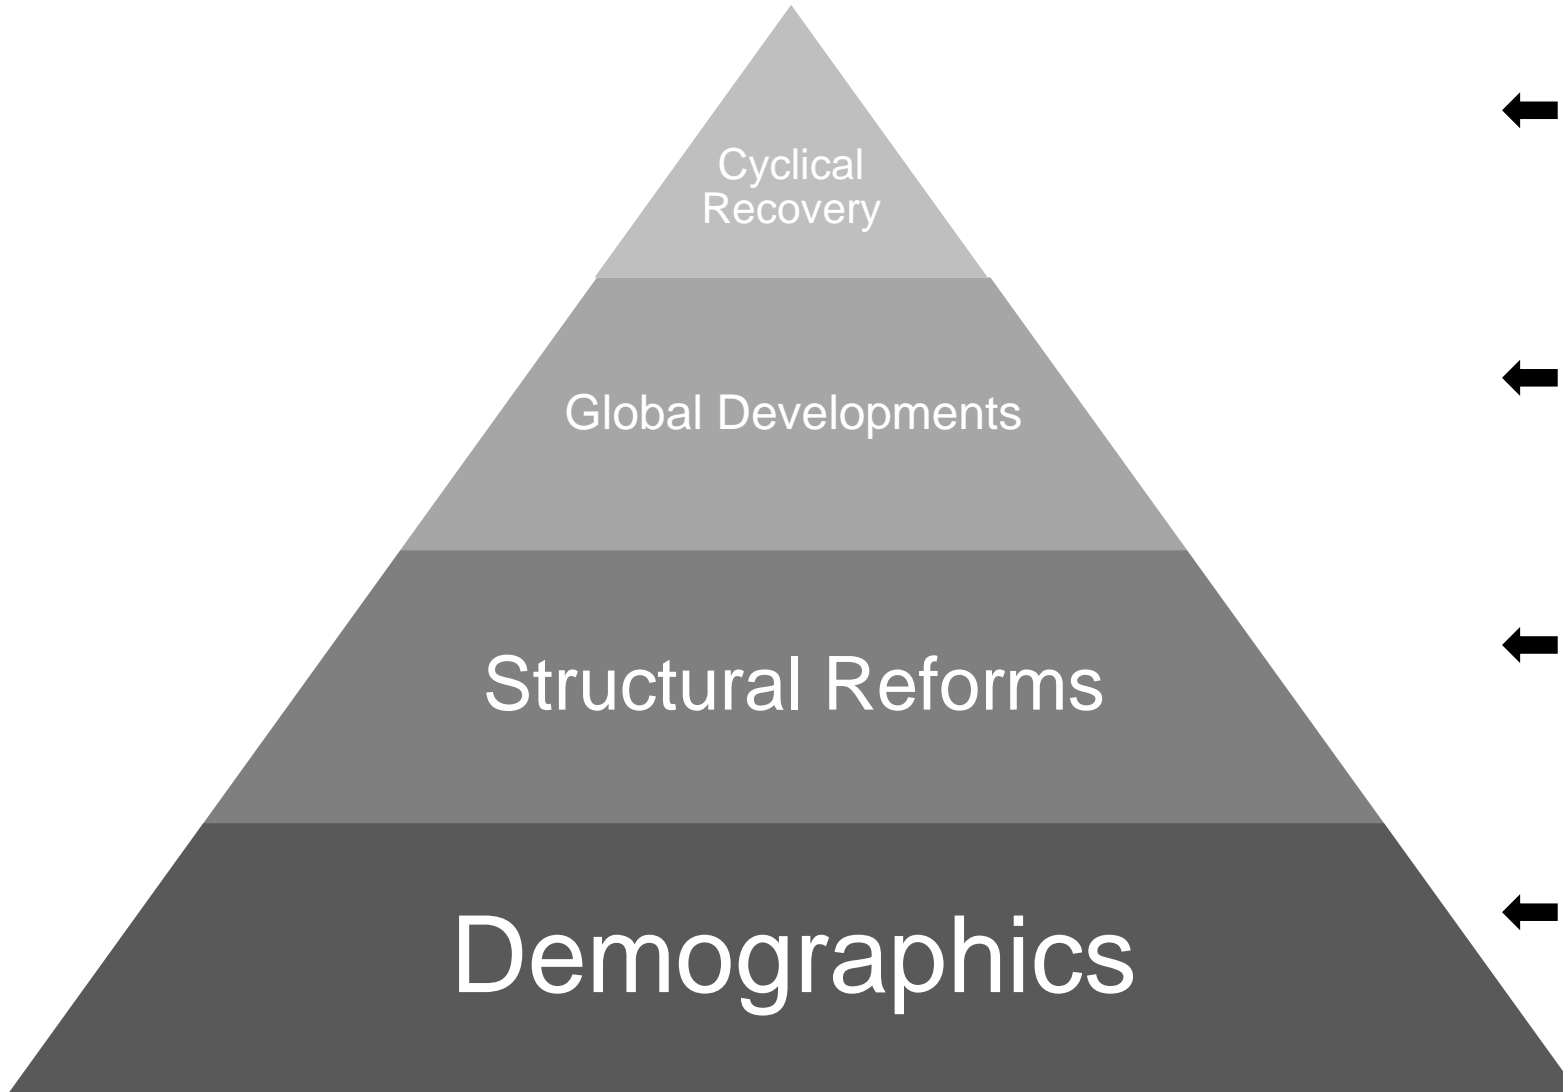

Philosophy

- We follow our proprietary stock selection framework, that largely emphasizes on “Qualitative Growth and Sustainability”. We believe long term outperformance is due to consistently investing in growth oriented quality stocks at a reasonable price

Structure & Suitability

- We use BSE500 as our stock universe
- We endeavour to see around 20-25 top stocks to strike a balance between diversification and sizeable alignment to best performing stocks.
- Growth stock ideas are best suitable for investors seeking high returns while taking reasonable risk.

Opportunities

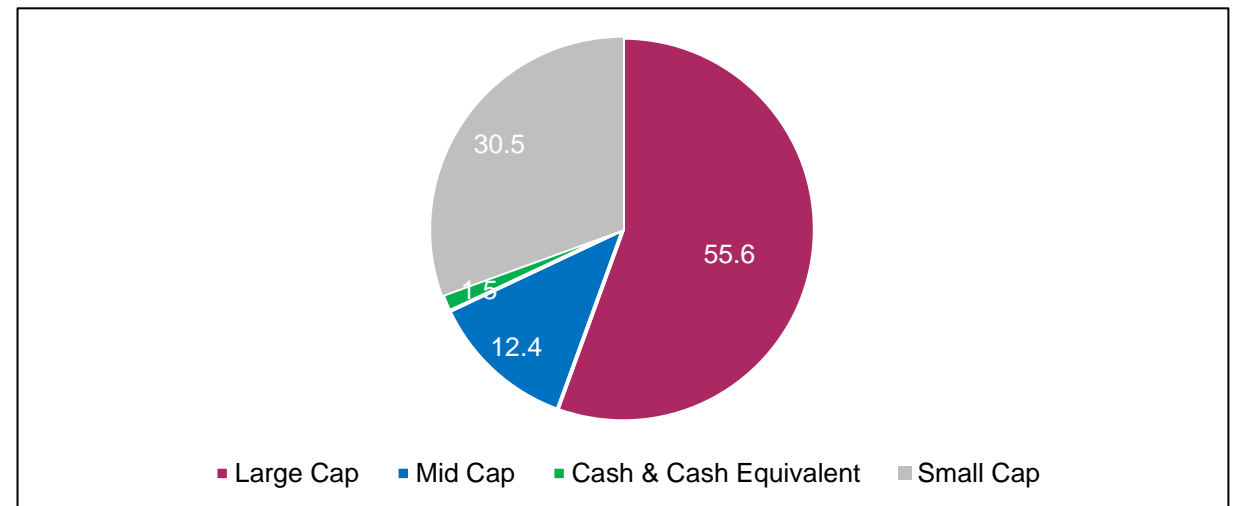

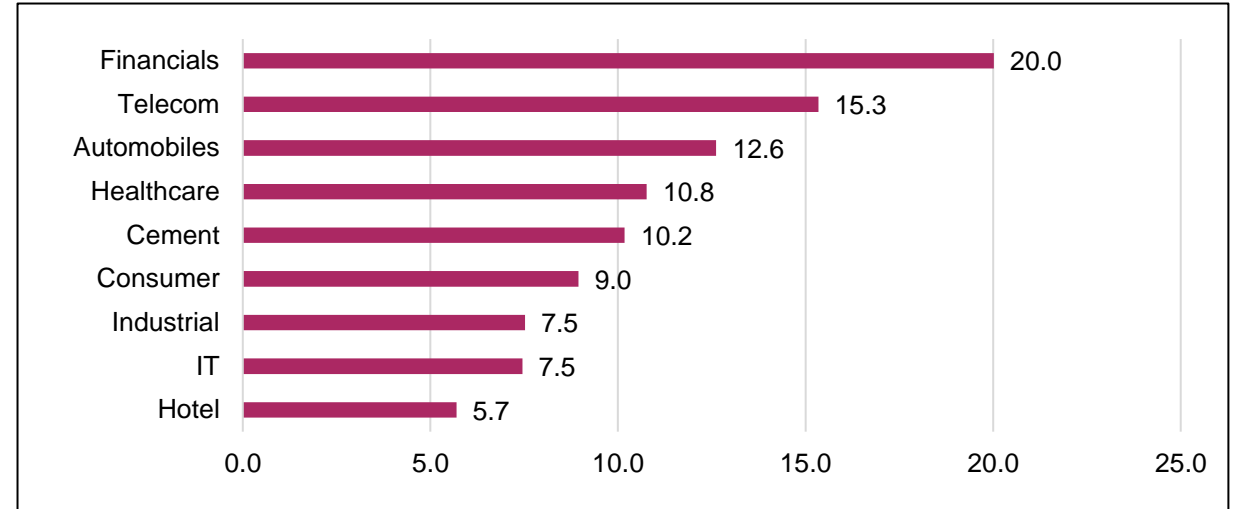

- In last couple of years events like US China Trade war, Russian Ukraine War, Geo-Political set up, Lower private capex, commodity price volatility India growth story was hampered. We believe, India is at the bottom of its cyclical downturn.
- In the light of recent global events like US-China trade war, US slapping tariffs on many countries including India, Rise in commodity prices India has emerged as one of the least impacted economy, setting stage for faster recovery.
- Various Structural reforms like GST / RERA / IBC / Reduction in Personal Income Tax/GST 2.0/ The China+1 strategy and PLI schemes; in recent past has prepared India for next leg of Growth. India is expected to become a USD 5 Trn economy in next 2 years.
- India has one of the most encouraging demographics with >50% of population is less than 25 years of age.
- Urbanization / Nuclearisation of Families and Increase in working population are key features of India growth story.

Value Ideas

Core Features

Objective

- The objective is to seek returns which will translate into long term value creation.

Philosophy

- We follow our proprietary stock selection framework, that largely emphasizes on "qualitative growth and sustainability". We aim to seek long term outperformance by following against-the-wind kind of investing style. Here we aim to take advantage from any miss pricing prevailing in market.

Structure & Suitability

- We use BSE500 as our stock universe
- We endeavour to see around 20-25 stock ideas to strike a balance between diversification and sizeable allocation to best performing stocks.
- Value stock ideas are best suitable for Patient investors with high risk appetite seeking high returns over long term.

Style and Opportunity

It is not always easy to do what's not popular, but that's where you make your money.

*- John Neff***

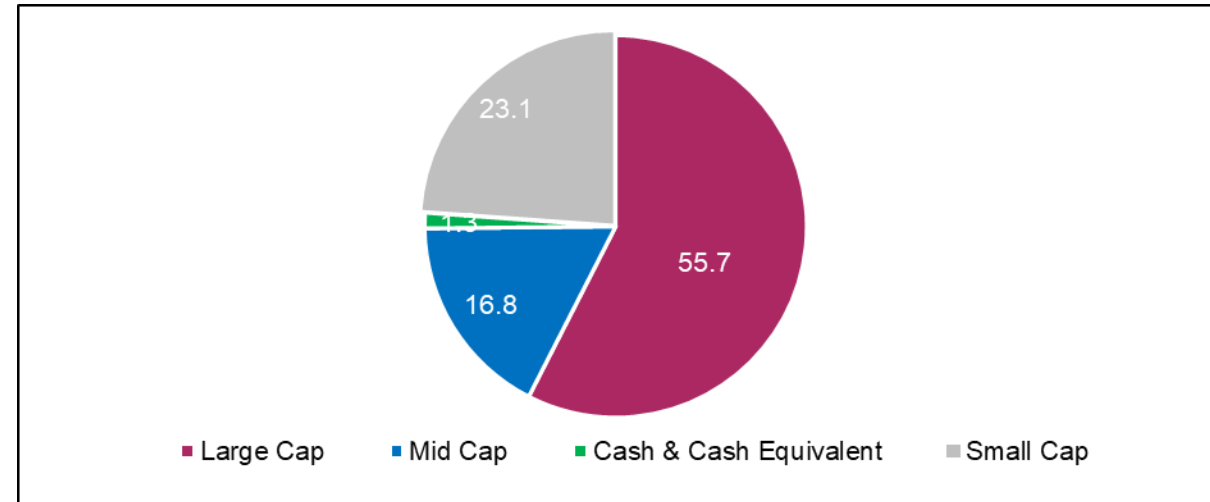

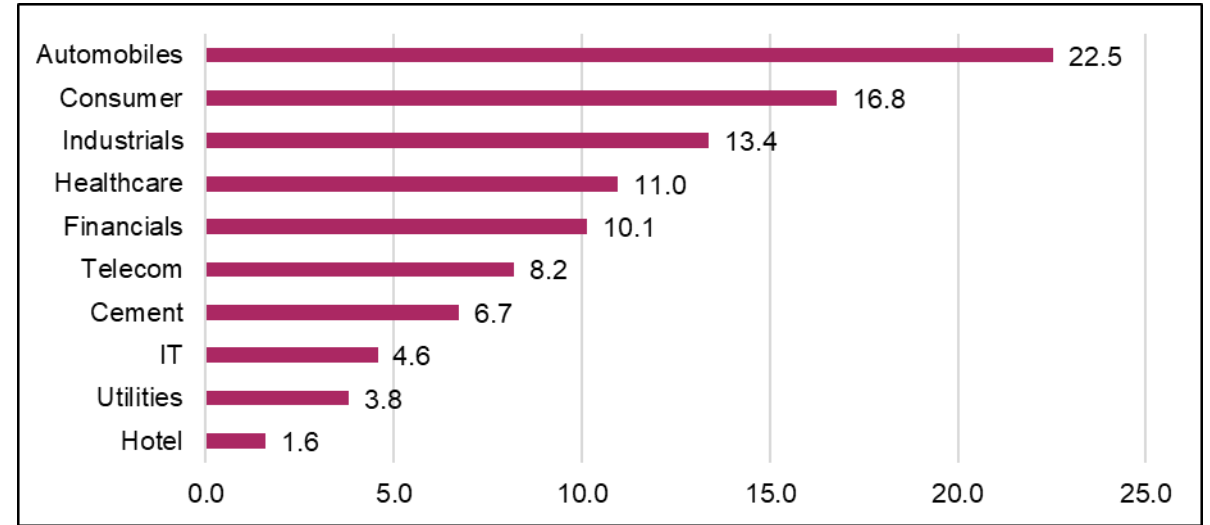

**John Neff, the legendary investment manager. He managed the Vanguard Windsor Fund for 31 years, through 1995. The fund posted a cumulative total return of 5,546%, nearly two-and-a-half times the performance of the S&P 500.

Sector wise Stock ideas

Suzlon Energy Ltd– BUY

- ❑ **Suzlon Energy Ltd** is a vertically integrated leader in renewable energy with three decades of operational excellence and a global workforce of over 8,500. As India's top renewable energy solutions provider, the company maintains a massive 21.5 GW installed capacity across 17 countries - comprising 15.5 GW in India and 6 GW internationally - supported by world-class manufacturing units and specialized R&D centers in Germany, the Netherlands, Denmark, and India. The company continues to drive innovation in the sector through its advanced 2.x MW and 3.x MW series wind turbine portfolios. **Strong Financial Turnaround and Fortified Balance Sheet:** Suzlon reported robust financial growth in Q3 FY26, with EBITDA growing 48% YoY and a 45% surge in PBT. In 9MFY26, EBITDA jumped 77% YoY. Crucially, the company maintains a strong net-cash position of Rs 1,556 Cr as of Dec'25, providing significant financial flexibility to support its execution ramp-up.
- ❑ **Record Order Book and Unprecedented Execution:** The company has built a, well-diversified order book of ~6.4 GW as of Jan'26, translating to a strong book-to-bill ratio of 1.9x. This demand is heavily driven by the S144 turbine series, which accounts for over 5.4 GW of the order book and is specifically tailored for Indian conditions and grid requirements. On the execution front, Suzlon achieved its highest-ever quarterly wind deliveries of 617 MW in Q3 FY26 (up 38% YoY), keeping it firmly on track to meet its 60% YoY growth guidance for FY26.
- ❑ **"Suzlon 2.0" Strategy and the DevCo Model:** Management is aggressively pursuing its "Suzlon 2.0" transformation, transitioning from a pure-play wind manufacturer into a "full-stack clean energy solutions conglomerate" encompassing wind, solar, and battery storage. This strategy is enhancing revenue visibility and aims to bring the EPC business share to ~ 50% by 2028.
- ❑ **High-Margin, Annuity-Like OMS Business:** The Operations and Maintenance Services (OMS) division serves as a reliable cash engine, boasting stable annuity cash flows with an installed base of over 15.5 GW and assets under management valued at USD 10 Bn. The company is further optimizing this segment by leveraging AI for predictive maintenance, which improves uptime and aims to push OMS EBITDA margins even higher than their current strong base of ~40%.
- ❑ **Emerging Export Opportunities and Policy Tailwinds:** Suzlon is poised to expand its Total Addressable Market (TAM) through international exports, expecting to book its first export contract (possibly in Europe) in FY27. Domestically, India's wind sector is entering its strongest growth phase with a target of 100 GW by 2030, driven by surging Commercial & Industrial (C&I) demand and the increasing necessity of wind power for Firm and Dispatchable Renewable Energy (FDRE) projects. The stock is currently trading at an attractive ~22x 12MF consensus P/E, supported by healthy return ratios. We recommend a **BUY** rating on the stock.

Jain Irrigation Systems Ltd– Exit

- ❑ **Jain Irrigation Systems Ltd (JISL)**, (Incorporated in 1986) is a diversified company primarily focusing on Agriculture offerings. Company also manufactures irrigation related products such as drip and sprinkler irrigation systems; PVC pipes, Polyethylene pipes (HDPE, LLDPE) etc as well as agro processing. Additionally, the company also provides solutions for solar pumps, solar water heating systems, photovoltaic systems etc.
- ❑ Jain Irrigation Systems Ltd (JISL) is currently navigating a challenging phase marked by acute financial stress, with liquidity pressures increasingly translating into solvency concerns and limiting visibility on a near-term recovery. The situation is further aggravated by a sharp decline in profitability and weak operating efficiency. Elevated working capital tied up in overdue government receivables continues to strain cash flows, necessitating reliance on relatively high-cost borrowings. Additionally, a significant promoter pledge of ~40.8% heightens the risk of potential stake dilution in the event of adverse price movements. The impact of margin compression poses concerns around company's sustainable growth delivery and could keep stock under pressure.
- ❑ Persistent leverage, ongoing restructuring efforts, delays in receivables, weakening profitability, constrained liquidity, and emerging governance concerns collectively limit the margin of safety for investors. In view of the above factors, We recommend a **EXIT** at current levels.

Thomas Cook Ltd– Exit

- ❑ Thomas Cook (India) Limited is an omnichannel travel company. The company was founded in 1881 and has more than 100 years of experience in the industry with presence in 28 countries. The company serves B2B as well B2C customers through a large network of partners and physical outlets. The Company is engaged in diversified businesses of travel and travel related businesses, working as travel agent, tour operator and an authorized foreign exchange dealer. The Company's segments include Financial Services, Travel and related services, Leisure Hospitality & Resorts business, and Digiphoto imaging services.
- ❑ Thomas Cook (India) Ltd is currently witnessing notable headwinds, reflected in a sharp sequential decline in profitability alongside sustained margin compression amid intensifying competition and elevated operating costs. Earnings quality remains a key concern, with a substantial proportion of pre-tax profits driven by non-operating income, thereby obscuring the underlying weakness in core operations. Additionally, return ratios have moderated to levels below the cost of capital and remain significantly lower than industry benchmarks.
- ❑ The company is contending with a mix of structural and cyclical challenges, including weakening profitability, subdued return metrics, dependence on non-core income streams, and increasing competitive intensity from digital-first travel platforms. With the stock correcting nearly ~28% over the past three months and limited visibility on near-term catalysts for re-rating, Accordingly, we recommend **EXIT** on the stock.
