

**NIFTY HIGHLIGHTS**

**Nifty's August** rollover at 63.5% is significantly higher than both the previous expiry's figure of 54.6% and the three- and six-month averages of 59.0% and 54.3% respectively, suggesting a strong conviction among traders and a continuation of the prevailing market momentum for the benchmark index. The cost of rolling over positions has also increased to 0.51% from 0.39% in the previous cycle, which, when combined with higher rollover percentages. **Bank Nifty's** rollover at 53.2% shows a more cautious stance. While it is higher than the previous expiry's 47.7% and the three-month average of 50.9%, it falls below the six-month average of 54.6%, indicating some subdued sentiment or potential profit-booking within the banking sector. The Market wide rollover has reached a notable 77.4%, a substantial increase from the 62.3% of the prior expiry and well above the three-month average of 63.0% and the six-month average of 64.0%. The option data for the **August series** indicates a strong Call Open Interest (OI) at the 25,000-strike price, followed by 25,200. In contrast, a substantial concentration of Put OI is observed at 24,600, with additional levels at 24,500. This suggests the likely range for the current expiry is between 24,500 and 25,000.
