Nifty daily chart

Nifty opened with an upward gap but witnessed selling from the opening tick to end on a negative note. Nifty closed at 10305 with a loss of 166 points.

On the daily chart the index has formed an “Engulfing Bearish” candlestick (reversal) pattern after facing major resistance near the 61.80% retracement level(10551) however any follow up down close will confirm the above said pattern . The index is moving in a Higher Top and Higher Bottom formation on the daily chart indicating sustained up trend. The chart pattern suggests that if Nifty breaks and sustains below 10250 level it would witness profit booking which would lead the index towards 10100-10000 levels. However if index crosses above 10400 level it would witness pullback rally which would take the index towards 10500-10600. Nifty is trading above 20 and 50 day SMA's indicating positive bias in the short to medium term. Nifty is expected to remain in an uptrend to sideways zone until it breaks 9550 on the downside.

The daily strength indicator RSI is moving upwards and is above its reference line indicating positive bias.

The trend deciding level for the day is 10380. If NIFTY trades above this level then we may witness a further rally up to 10480-10650-10750 levels. However, if NIFTY trades below 10380 levels then we may see some profit booking initiating in the market, which may correct up to 10205-10110-9935 levels
